

# NEVADA DIVISION OF WATER RESOURCES - Administrative Hearing Update -

January 19, 2021

Good Afternoon,

Based upon review and consideration of public comment and ongoing communications with interested persons, the State Engineer has elected to withdraw the proposed administrative regulations relating to State Licensed Water Right Surveyors (R170-20). These regulations were initiated in response to the high volume of errors and returns for correction to water right maps submitted to the Division. However, after weighing public comment, the Division will address this issue through increased training and updated

regarding the submission of surveyed water right maps. Accordingly, **R170-20 will be withdrawn and the Public Workshop scheduled for February 5, 2021 is cancelled.** The Division intends to work closely with our State Licensed Water Right Surveyors community in conducting these trainings and to determine if specific and limited regulations in the future may be appropriate to assure high professional standards in the submission of water right maps.

The State Engineer wishes to extend his appreciation for the comments and feedback relating to the proposed regulations submitted by the Division.

## Upcoming Dates

R170-20 (Water Right Surveyor):

~~2/5/2021, 9:00 a.m. (virtual)~~
